

| "Know your Steps"  | Rubric |                |
|--|--------|----------------|
| <p>The core of this performance task required by this task are:</p> <ul style="list-style-type: none"><li>• Solving equations containing integers, decimals, and fractions and identify the relationship between additive inverse in terms of change.</li><li>• Solving equations involving two operations, multiple operations, including combining like terms and the distributive property, variables on both sides.</li><li>• Write and solve equations from a given real life situation</li><li>• List all steps needed to solve the equation</li></ul> | Points | Section Points |
| 1. Write and solve equations from a given real life situation  |        | 20             |
| 2. Give correct explanation such as:<br>LCM, is used to remove the fractions<br>Combine like terms to simplify the expression<br>Inverse operation to add or subtract<br>Inverse operations to multiply or divide  |        | 15             |
| 3. Give correct answer by showing your work, such as:  |        | 10             |
| 4. Show limited work   |        | 5              |
| <b>Total Points</b>  |        | <b>50</b>      |
